Reproduction Of Original Over the years, these 1970, 1971, 1972, 1973, 1974, 1975 Camaro radiator core support bushing fatigued from gravity and environmental pressures bringing back those annoying squeaks and noise so common in the past. Replacement of these 1970, 1971, 1972, 1973, 1974, 1975 Camaro radiator core support bushing bushings can be done with minimal mechanical knowledge and basic tools in an afternoon. Our F-Body radiator core support bushings are made from high quality, extra firm rubber with the proper steel insert. Our steel inserts are carefully cut to factory specifications which are critical to proper crush during torque application. All new washers and nuts are included to replace the old warped, rusted and stretched units.

Will replace distorted and worn-out original rubber mounts to maintain car body and truck cab to bed alignment. Original rubber mounts are so soft they often crack, distort, and crush so badly they often fall off! And aluminum body mounts are too harsh for street use that they tend to break and cause other components to break. Energy's specially formulated Hyper-Flex(TM) polyurethane cab and body mounts combine the best qualities of both: they're soft enough for a smooth ride, yet rugged enough for the most demanding road or track. Most sets have a strong zinc plated steel ring molded into them - for added durability and when the application requires it.		
Features:		
• Replace To Restore Ride Height		
• Gain Durability		
• Stronger Than Original Rubber Mounts		
• CAMARO SUB FRAME MOUNT SET

2035270	OER Upper Clutch Push Rod Boot 3973089	33.99
---------	--	-------

The bellhousing to clutch fork rubber boot seals out water and dust by sealing around the clutch fork and the rectangular fork hole in the Camaro clutch bellhousing. Every time you push the clutch pedal in your manual transmission Camaro, the clutch fork boot gets a work out and will eventually tear. NOTE: Camaros with hydraulic throw out bearings may use this boot for the hydraulic lines to pass through as some measure of protection. However, the clutch fork boot will not provide an air tight seal.

Stock Replacement Also Called A Rear End Cover Gasket
The Camaro differential cover gasket on your 1967, 1968, or 1969 Camaro is located between the rear end and the cover. This gasket is prone to wear and tear, breaking, and cracking. Overtime, all of this stress will culminate, resulting in leakage. This means that it is now time to replace your 1967, 1968, and 1969 Camaro's differential cover gasket. Did you know? Many people in our hobby refer to the differential cover gasket as a rear end cover gasket.

Camaro bulbs burn out; it's just a fact of life. And,
Murphy's Law states they will burn out at the worst time
in the worst possible place. Over time, constant heating
and cooling slowly deteriorates the seal where the
contacts are exposed allowing the gas to escape from the
bulb. You will not find a more complete selection
anywhere else. If we don't have it, it's not being made.

RELAYS & RESISTORS » Blower Motor Resistor

OER Reproduction blower motor resistor for 1973-81 Camaro models with air conditioning. Each resistor is an exact reproduction of the original GM component, designed to fit and function just like the original AC Delco resistor. The blower motor resistor is responsible for controlling the speed of the fan. Because the speed of the fan is a setting that is frequently adjusted by the driver of the vehicle, these resistors are often under continuous stress or strain which can cause the resistor to eventually fail. A common symptom of a bad resistor is a blower motor that is stuck on one speed or a motor that does not work on certain settings. Another symptom of a bad resistor is no power at all to the blower motor resulting in no air from the vehicle's vents. Applications:

Premium Quality Blower Motor Resistor Replaces Original Exactly For 1967-1981 Camaros Without Air Conditioning Located On Top Of Under Dash Heater Box Having trouble getting hot air out of your Chevrolet Camaro's heater system on anything other than a high speed? The problem is most likely your blower motor resistor! This little fiberglass board uses a series of progressive resistors to regulate the motor's speed throughout the switch range. The highest speed of the heater blower motor is not controlled by the resistor. Because of this, when the resistor fails, the fan will often work on the highest speed setting and not any lower speed. You shouldn't have to settle for getting just one speed.

Your Chevrolet Camaro was meant to keep you comfortable while driving in nice weather. Easy-to-open windows make this happen. Power window switches route power directly to the respective door window motors and allows the motors physically raise and lower. This Camaro switch consists of the operating buttons or toggles, circuit board inside the unit, and contact points for your wiring. When you move the button or toggle, an electrical connection is made by touching contact points together and power is routed accordingly. This is one of the highest failure items on any vehicle. If your Camaro's power window switch starts to smoke, button develops excessive play or button breaks off of the switch completely, you will need to replace the F-Body power window switch.

Although extremely rare for a fuse to blow or the problem to be faulty wiring or motor, you should still check these items before replacing the Camaro power window switch. stepped bezel? and button. Completely assembled with correct black spring steel mounting clips installed, installation is sure to be easy. Nothing beats cruising in your Camaro with your arm resting over the open window.

Restoration Correct Quality Construction Camaro outside door handles go through a lot over the years. Your F-Body Camaro exterior door handle sees temperature swings from hot to cold, abrasive wind and common wear from use. Camaro door handles lose their chrome luster and often are prone to failure from fatigue and worn springs. Plus nothing looks worse against a freshly painted Chevy Camaro then a used outside door handle. Rechroming or refinishing your Chevrolet Camaro exterior door handle may mean the loss of fine detail nor does it correct any hidden stresses. Our Camaro outside door handles are made using modern manufacturing techniques and sourced from only the world's best manufacturers to insure you get the best F-body Camaro door handle at the best price. Reproduction Of Original Injection-Molded Black Plastic Correct For Z28 Models When it comes to your 1978 or 1979 Camaro, the grille is a major focal point. Not only is it crucial to the proper functioning of the radiator and engine, the grille is also responsible for cosmetic appeal. Your Camaro's grille unlocks a unique style, setting the standard and flair for the rest of the car to follow. As most car enthusiasts know, automobile grilles are prone to damage. Due to their prominent location, grilles are vulnerable to an array of elements. Little stones and grains of sand can effectively sand blast the front of your Camaro away. Maybe it is an accident or a new desired look, the fact is that it is not uncommon to either replace or upgrade the lower grille. Achieve a premium look and peak performance; invest in a new lower grille for your 1978 and 1979 Camaro.

This kit attaches to the core support and barely touches the bottom of your Camaro hood to keep it in place. As your A-Body rolls down the road, the hood is constantly moving side to side and front to back on the hood hinges. When topped with the rubber hood bumpers, this kit keeps the hood from moving around too much and scratching your Chevelle's paint and it keeps the hood from going down too far when it is shut. This set or four includes correct slotted head screws and flanged stop nuts.

HOOD & COWL » Hood Insulation

It's not there to merely offer sound suppression from your engine or to protect your paint from heat. Your hood insulation is there to offer you some protection in case of an engine fire. During heavy heat, the plastic clips that hold the insulation in melt dropping the insulation on top of the engine to smother and reduce the spread of flames. Because of this, some F-body Camaro hood insulations are made to only cover the engine and not fully cover the inside of your hood. Running a car without Camaro hood insulation can be a critical safety error that no one should make. Our affordable hood insulations are carefully sourced from quality manufacturers and made from modern asbestos free materials.

Reproduction Of Original For Front Windshield Glass
Chrome Finish 5 Piece Kit With Retainers Fits 1970-1981
2nd Gen Camaros The windshield moldings on your 1970,
1971, 1972, 1973, 1974, 1975, 1976, 1977, 1978, 1979,
1980, or 1981 second generation Camaro go through a lot
of abuse over the years. From the harsh barrage of
outside elements, the chrome moldings can become
scratched, bent, cracked, or come off altogether. With
broken or missing windshield moldings, your glass
becomes exposed, not to mention your Rally Sport, Super
Sport, Standard, Z28, or Type LT Camaro won't look its
best when out on the road. Don't let this happen on your
front windshield glass, and ensure that you have brand
new moldings to keep your F-Body's exterior protected.
This complete set of five pieces are made of polished
chrome and include retainer clips. These moldings will
easily replace your originals for a quick installation, and
will protect your front glass for years to come.

Quality Reproduction Bolt-In Panel Installs Between Back Glass & Trunk Lid Black EDP Coated Second generation Camaros are notorious for rusting at the rear window and at the trunk hinges. For some unknown reason GM designed this area to hold water like a cereal bowl. As a consequence, this area will rust out and take the mounting tabs of the rear window to trunk panel with it.

This kit attaches to the core support and barely touches the bottom of your Camaro hood to keep it in place. As your Camaro rolls down the road, the hood is constantly moving side to side and front to back on the hood hinges. When topped with the rubber hood bumpers, this kit keeps the hood from moving around too much and scratching your Camaro's paint and it keeps the hood from going down too far when it is shut. This set of four includes correct slotted head screws and flanged stop nuts.

GM Licensed Reproduction For Use On Standard Non Rally Sport Cars With Turn Signal Lights Under The Bumper ONLY Please See Additional Images Below To Confirm Your Application It is a known fact that Camaros look great with a front spoiler. They show off the overall style of your 1970, 1971, 1972, or 1973 Camaro, and people love to see them. However, they are also in harm's way and can be damaged or ripped off when hitting a tail curb or in minor fender collisions. It is unfortunate, but is something that can be fixed. Matching factory specifications, this front spoiler will easily replace the original and will leave your F-Body Camaro looking super stylish again. Note that these front spoilers are for use on standard Non-Rally Sport vehicles with turn signal lights under the bumper. It is an un-written rule, Camaros need a front spoiler. Let's face it. They are cool and everyone likes them. But, they can also be ripped off on a tall curb at your local cruise in or car show.

Reproduction Of Original For 1970-1972 Models
Replacement For 1973-1978 Models Requires The Use Of
1970-72 Wiper Switch Chrome Trim Your Camaro's dash
carrier bezel may have succumbed to damage over years
of use. It doesn't help that you are constantly reminded of
your 1970, 1971, 1972, 1973, 1974, 1975, 1976, 1977, or
1978 Camaro's imperfections since you always have to
look at the dash while driving! Don't settle for looking at a
cracked and scuffed dash bezel all day, and instead be
reminded of your smart purchasing decisions by checking
out your shiny chrome-lined dash. tbe sorry! Treat your
1970, 1971, 1972, 1973, 1974, 1975, 1976, 1977, or 1978
Camaro with the respect it deserves with a new dash
carrier bezel.

Best Quality Reproduction Camaro Window Crank Handle Hard Chrome Over Diecast With Crystal Clear Knob (Not Incorrect Hazy Yellow) Reproduction Of Original GM Replacement Window Crank Handle Correct Length Internal Splines For Tight Engagement With All Reproduction & Original GM Window Regulators Retaining Clip Included Sold Each Your 1967, 1968, 1969, 1970, 1971, 1972, 1973, 1974, 1975, 1976, 1977, 1978, 1979, 1980, 1981 Chevy Camaro window handle goes through a lot. Over time, fatigue and stress slowly wear at your F-Body Camaro window handle, causing it to fail. Sometimes the mounting slot becomes oblong and stripped, or your knob breaks free. Other times, your Camaro window handle simply snaps in half. More than a simply good looking chrome plated window handle, these new reproductions are made with modern materials and manufacturing techniques to withstand excessive window use for years to come. Die cast like the factory units, these window cranks are then chrome plated and a stylish knob is added to give that authentic look to your interior. NOTE: Some window regulators on the market today have splines which are a little too long for the handle clip to engage. This can be remedied by shaving down the shoulder in the window crank with a dremel tool.

Replacement Carpet Sound Deadener Asphalt Mat Reduce Road Noise & Heat Die Cut Seven Piece Set Under carpet sound deadener sets may not be something that most people would think about, but they would be immediately reminded of it whenever they're driving on the highway or in busy areas. Over time these may need to be replaced after excess wear, but they are very useful in providing a barrier in your 1970, 1971, 1972, 1973, 1974, 1975, 1976, 1977, 1978, 1979, 1980, or 1981 Camaro under under-car heat, cold, and loud road noise when driving at fast speeds. Carpet sound deadeners also add an extra layer of padding under your feet for additional comfort. Don't let the loud noises of the road ruin your Camaro driving experience.

2038771 Under Carpet Sound Deadener Set, Asphalt Mat, 1970-1981 84.99

Quality carpet underlay used to eliminate noise and add padded comfort on the floor carpet. Carpet underlay helps protect floor pans from rust and acts as a barrier against outside heat, cold and noise. We recommend replacing your original underlay when installing a new set of carpet. Good Quality Reproduction Pedal Pad Kit For Camaro Includes Pedal Pads For: Gas, Brake, Clutch & Parking Brake Plastic Gas Pedal As Original Injection Molded Brake, Clutch & Park Brake Pad Clutch Pedal Pad Is For The Smaller 2 Pedal From 1972-1981 For The 1970-1972 3 Pedal Please See Our Part # 720403 Camaro gas pedals are a principal part to have lying around your garage. Whether you are a restoration enthusiast or just an everyday driver, it is important to always be preemptive in your automotive needs. As you probably know, the gas pedal controls the throttle valve. When you get off from a long day of work, stomp heavily on the gas, and rush home to catch the wife's dinner, it is the gas pedal you are activating. We do not often think about the wear and tear happening beneath our feet, rather, we just hit the gas and go. Over time, your accelerator pedal will, without a doubt, erode and potentially even break. At this point, only the metal will remain, and we have all seen what this looks like. Don't sacrifice performance, style, and safety over something as elementary as the gas pedal. IMPORTANT: Please measure the clutch pedal in your Camaro at its widest point! 1972 Camaros could have had a 2 or a 3 wide pedal. This pad in this kit fits the smaller 2 Pedal.

NOTE: This item comes in a very Dark Blue.

Reproduction Of Original Holds Shoulder Belt Retainer To The Upper Portion Of The Bucket Seat Commonly Overlooked Or Lost During Replacement of Seat Upholstery Fits Driver's Side (LH) While the shoulder belt retainer is important in retaining your seat belt in a locked position, the shoulder belt guide escutcheon is necessary in keeping the retainer in place in your 1974-1992 Camaro. The guide escutcheon holds your Camaro's shoulder belt retainer to the upper portion of your bucket seat, and without it, the retainer could not be held up, and your shoulder would fall. This is a commonly overlooked or lost item during seat upholstery replacement, but is important for function and for the look of your Camaro's interior.

Energy Suspension(R) performance bump stops help cushion a collapsing suspension, preventing bottoming-out and expensive vehicle damage. Hyper-Flex(TM) performance polyurethane bump stops for control arms, traction bars, leaf springs, etc. are guaranteed to last longer and operate more efficiently than original rubber stops. The smaller, general purpose bullet shaped snubber is ideal for control arms. The low profile button head is for use when clearance is limited. Our large competition race style bump stops smooth out compression better and have a large reinforced metal plate welded to the mounting plate and molded-in. Each style is specially designed for a perfect and custom fit and each style has it's own durometer, hardness, characteristics. Energy's wide selection of bump stops are available in red or black color.

Features:

- Made Of Superior Hyper-FlexMaterial
- Helps Prevent Damage To Control Arm
- GM PULL THRU BUMP STOP

Cut out your old plates, flush weld in these replacement plates and make your old Camaro subframe as good as new. NOTE: These plates must be welded flush with the surrounding metal or subframe geometry could be seriously effected. On 1970-81 Camaros, the mount plate that welds to the under firewall mount must be trimmed to fit. 75-81 Subframes have some mounting holes moved forward. These plates will need to be aligned properly for use.

Originally Camaros had a consistent ride height with the front end and rear end level. Many 1970, 1971, 1972, 1973, 1974, 1975, 1976, 1977, 1978, 1979, 1980 or 1981 Camaros out on the road today could use new leaf springs.

- **Spring Capacity = 635**
- **Spring Rate = 126**
- **# Leaves = 4**
- **Measures (A/B) = 25 x 31**
- **Width = 2-1/2"**
- **Includes Front Eye Bushing**

WARNING: All bolts at the spring mounting points should be left finger tight until all the weight of the car is put on the springs (i.e. rear end supported by jack stands). Then, proper torque should be applied to all points (torque specs available in the factory assembly manual). Failure to follow this procedure could result in one side of the car sitting lower than the other. Also, installing springs in a car under restoration can result in the body sitting 4-6" off of the rear tires. This should settle when items such as the interior and fuel tank are installed.

Soft & Pliable Plastic Clips Molded-In Door weatherstrips
are crucial for protecting your 1970-1981 Camaro from
any outside weather elements. Have you noticed that rain
is starting to collect near the bottom of your inner door?
Chances are your weatherstrip has worn down and isn't
guarding the inside of your doors like it should be.
Installation is simple, as the weatherstrip goes around the
bottom of the door, sealing against the bottom inner door
frame. All you have to do is remove the old weatherstrip
clips so that it comes off. Clips are included, which pop
into the holes of your Camaro door, to ensure that it stays
attached. Having new weatherstrips will prove that you
have paid attention to detail on your Camaro.*

(xvii) Submissions. All suggestions, ideas, notes, concepts and other information you may from time to time send to us (collectively, "Submissions") shall be deemed and shall remain our sole property and shall not be subject to any obligation of confidence on our part. Without limiting the foregoing, we shall be deemed to own all known and hereafter existing rights of every kind and nature regarding the Submissions and shall be entitled to unrestricted use of the Submissions for any purpose, without compensation to the provider of the Submissions.

(xviii) Return Policy. Items must be returned in the original packaging within 30 days of invoice date for a refund of product cost to the original terms on the invoice. Items returned within 30 days not in the original packaging are subject to a 30% restocking fee. Items returned after 30 days not in a condition to be resold will be repaired and returned at the customer's expense. If the item is not repairable it will be returned to the customer at the customer's expense. Items returned after 30 days in the original packaging you will be issued a refund to the original terms on the invoice less a 30% restocking fee. Items returned after 30 days not in the original packaging will be returned to the customer at the expense of the customer. No returns on electrical products or tools. Returns will not be accepted for any orders older than 90 days. No returns of a partial set, parts will be mailed back to the customer at customer's expense. Exception returns may result in a merchandise credit. There are no returns on seatbelts. There are no returns on special order items. In the event the item is defective it will be replaced. Refunds greater than \$50 will be issued in the form of a company cheque, otherwise they will be refunded by way of their original payment method.

(xix) Cancelled Orders. Please be advised that once an order is submitted to Camaro Depot, there is no guaranteed possibility of cancellation. If you have attempted to cancel your order with us, and your cancellation has been denied, the item or items that you have ordered may not be eligible for cancellation. Items that may not qualify for cancellation can include: An order that has already shipped, an order that is in the process of being fulfilled by the warehouse, the items you are cancelling are custom made (ie. Painted Products, Floor Mats, Carpet, Interior Softgoods such as Seat Covers / Door Panels), the item is drop shipping from the manufacturer, the item is a gift certificate / digital gift card, or your order is being processed for a return.

If a customer requests cancellation of an order after the order is in processing in our warehouse, or after the goods have actually been dispatched from the warehouse to the shipping department, Camaro Depot reserves the right to charge a restocking fee of up to 30% of the value of the goods, deducted

from the resultant refund or credit.

(xx) Verify Members' Address: Camaro Depot reserves the right to contact a Member via email to verify the accuracy of account information (including the Member's correct name and address) that is needed to provide the Member with the information he or she requested from Camaro Depot. Member emails are automatically subscribed upon checkout to company newsletters with an option to opt out at any time.

(xxi) Pricing Policy: Due to the fluctuation in exchange rate on a daily basis, Camaro Depot cannot provide a refund for any decreases in pricing on our website. Pricing of all parts includes conversion into Canadian dollars based on the daily exchange rate. Camaro Depot reserves the right to cancel any orders due to pricing errors on any products.

(xxii) Electrical Item Warranty: Camaro Depot does not allow any refunds on electrical items, they can only be returned for exchange. All items that fall under this policy will be outlined in a disclaimer below the product name on the shopping cart page along with the product invoice. The reason that there are no returns on electrical items is that too many people try to take advantage of the return system. Instead of using proper diagnostic procedures, some people resort to trial-and-error parts swapping when they don't know how else to fix an electrical problem. When parts they have installed do not fix their problem, they want to return them and try something else. Electrical parts are easily damaged by improper installation or testing. Because electronics are very sensitive to voltage overloads, it does not take much of a voltage spike to ruin a component. Unplugging a wiring connector while the key is still on can create a momentary voltage surge of hundreds of volts. Crossing up the wrong wires or using the wrong test procedures can also damage sensitive electronics. We have no way of knowing whether or not the part has been used or damaged. Because of these risks there are no returns on electrical components. This policy will protect the next customer who might get a bad part that had been returned. Electrical items that are found to be defective within the first 30 days after receipt of product will be covered by our warranty policy. There are no exceptions to this policy.
