Now you can convert your stainless steel sleeved Corvette calipers into the new and improved o-ring style calipers. Proven to last longer and perform better with this conversion kit than the factory style lip seals, this kit gives you everything, but the labor and fluid. No more weeping seals due to long periods in storage, but when in action, the o-ring provides a tight seal for maximum pressure and sure stops. Kit includes specially designed pistons, piston o-ring seals, outer boot seals and caliper half passage seals. NOTE: Each kit converts 1 caliper. Should be used with stainless sleeved calipers. Includes Pistons, O-Ring Seals, Dust Covers & Half-Seals.

- **Converts Dated Ignition Systems To Modern HEI Technology**
- **Easy To Install**
- **Improves Engine Performance**
- **May be Supplied With Red Or Black Cap (No Choice)**
- **Distributor May Not Clear High Rise Or After Market Manifolds**

Now with a simple distributor swap you can get all the benefits of HEI technology plus performance enhancements on top of the original HEI. For example the original HEI had a 38,000 volt module, pickup and coil, this unit provides 50,000 power packed volts! The original system had bushings in the housing, this model has needle bearings for smoother operation and longer life. Plus, this one-piece distributor has a 4340 hardened steel cam gear for use with all roller cams and brass terminals in the distributor for greater conductivity than the stock aluminum terminals. So when you compare this tachometer drive distributor to what your car came with you're getting a tremendous hi-performance distributor that eliminates the points and coil and gives you all the firepower you need for your Corvette's ignition. This unit simply bolts into place, all you have to do is run a 12 volt power lead to the distributor.

There are many sounds and sensations Corvette fans look forward to experience when enjoying their favourite sports car. The rattling of a door window is definitely a sound an owner would want to eliminate as it may also result in scratches to the window's glass if not addressed. This condition is often a result of a worn anti-rattle door window bumper pad in need of replacement. This set of anti-rattle door window bumpers from Redline Restomotive® is suited to reduce the annoying rattling on 1969-1996 Chevrolet Corvettes.

- For installation on 1969-1996 Chevrolet Corvettes
- Replacement for factory original equipment
- Prevents window rattling and scratching
- Kit includes 4 felt-covered cushions and 4 metric-sized bolts

FINALLY!! An insert to fill in the blank, "black holes" in your side fender. All other years of C3's had some type of insert or grille, except the 73-79's. Transform your 73-79 Corvette with that great classic look shared by earlier and later Corvettes by dressing-up the front fender vents. Our matt black grilles are computerized WaterJet precision cut and each kit comes with everything you need for easy installation. Unlike, other aftermarket grilles, our patent pending all weather attachment process does not require any permanent modification to your body or use tape that can easily fall off. No Holes to Drill in the paint!! If you want to dress up those black holes in your C3 fender vents and give your car that look that it should have had from the factory, you will love these high quality anodized aluminum matt black grilles. Take a look at the pictures of this item as they say it all.

The Headlight Door Actuator mounts directly to the housing support. The Clevis Link Pin threads onto the shaft that slides in through the support hole. **NOTE:** For 1981-1982 Corvette Owners: The position of the Left and Right Actuators were reversed for 1982 and possibly 1981 Corvettes built in Bowling Green plant. The curved tube on the back of the actuators points outboard on 1968-1981 Corvettes and points inboard on 1982 Corvettes. Therefore, for 1982 models you need to order Left unit for Right side and Right unit for left side.

Chevrolet Corvette Rubber Carpet Fasteners are designed as integral components to secure the carpeting in place within the vehicle's interior. Constructed from durable rubber materials, these fasteners are engineered to withstand the rigors of daily use and maintain a secure grip on the carpeting, preventing shifting or movement. These fasteners feature a push-in design, allowing for easy installation without the need for specialized tools. Once installed, they provide a reliable anchor point for the carpeting, ensuring a snug fit and a clean, finished appearance.

The Corvette parking brake console seal is a component specifically designed for the model years 1967 to 1976 of the Chevrolet Corvette. This seal is located on the parking brake console, which is the area where the parking brake lever is housed in the center console of the vehicle. The purpose of the console seal is to provide a tight and secure seal around the parking brake lever, preventing dirt, dust, and other debris from entering the console area. It helps to maintain the cleanliness and functionality of the parking brake system by keeping unwanted particles out.

Many Corvette fans would agree that their favourite sports car is a source of beautiful sounds and music. With the third generation (C3) Chevrolet Corvette, the engine roar is certainly an audible delight but the older radio and sound system may not elicit a similar sensation. For owners of Corvettes built between 1968 and 1977, Innovative Corvette Products offers a slick, tuck-away product for awaking an audio system with a modern speaker set. Ready to receive an owner's choice of speakers (sold separately), the Corvette Audiophile Plus Speaker System kit is designed to preserve rear compartment space ideal for storing T-tops.

- Handcrafted in the United States assembled with premium MDF acoustical material
- Designed for 6x9 speakers (Not Included)
- Sizing of speaker system fits to maximize rear compartment storage and not to interfere with rear OEM lighting

For installation on 1968-1972 Corvette convertibles with rear window trays, removal of the tray is necessary. Removal and storage allow the speaker kit to comfortably fit in the wheel wells.

3116755 Audiophile Plus Speaker System, without Speakers, 1968-1977 438.99

Custom mounting against rear horizontal panel of the Corvette storage areas looks like factory installation with very little reduction of storage space. May also be used on 78-80 Corvettes without optional dual rear speakers. Only 3" deep with 2- 4" woofers, 2- mid range speakers and 2- 2" tweeters (6 speakers total!). 200 watt power handling. Not available for convertibles. This radio speaker bar is made in 3 pieces. Each speaker box measures 19" wide by 7" tall x 2 5/8" thick. The vinyl center panel measures 23" wide by 6 1/2" tall.

When the third generation Chevrolet Corvette was released, high-end audio equipment was a FM radio and an 8-track cartridge player. Although you may be passionate about the styling and engine power of your C3 Corvette, this affection doesn't need to extend to the half-century old audio technology. The Corvette Audiophile Plus speaker system from Innovative Corvette Products saturates a two-seat cabin with amazing, high fidelity sound from Rockford Fosgate speakers arranged in a compact, tuck-away design.

- Designed to fit Chevrolet Corvette models produced between 1968 and 1977
- Tuck-away design does not interfere with rear compartment storage or with rear OEM lighting
- Speaker kit assembled with MDF acoustical material
- Rockford Fosgate Prime 4-Ohm two-way speakers each boast a performance of 65 Watts RMS(130 watts maximum)
- Handcrafted in the United States

Important Note: For installation on 1968-1972 Corvette convertibles with rear window trays, removal of the tray is necessary. Removal and storage allow the speaker kit to comfortably fit in the wheel wells.

- 1009421** Body Mount Cushion Set, Poly, 1963-1969 107.99

Unlike stock rubber mounts which gradually compact, these polyurethane body mounts are a once-in-a-lifetime replacement. One set does the entire car.

- All components are individually packaged and identified and include easy to follow instructions.

4843354 Body Mounts, Polyurethane, 1973-1982 124.99

Will replace distorted and worn-out original rubber mounts to maintain car body and truck cab to bed alignment. Original rubber mounts are so soft they often crack, distort, and crush so badly they often fall off! And aluminum body mounts are too harsh for street use that they tend to break and cause other components to break. Energy's specially formulated Hyper-Flex(TM) polyurethane cab and body mounts combine the best qualities of both: they're soft enough for a smooth ride, yet rugged enough for the most demanding road or track. Most sets have a strong zinc plated steel ring molded into them - for added durability and when the application requires it.

Features:

- Replace To Restore Ride Height
- Gain Durability
- Stronger Than Original Rubber Mounts

----------------	--	--------

There are many reasons to replace the rear leaf spring on your C2 or C3 Corvette, which by now may have broken leaves or is simply fatigued. The most obvious symptoms of a rear leaf spring needing replacement are the ride height is too low and the car's handling is poor. Beyond symptoms, a weakened rear leaf spring harms the drivetrain by forcing the parts to run at an incorrect angle. This puts the U-joints in a tighter bind position, pushes the differential yokes into the pinion shaft, often requiring their replacement and places unnecessary wear on the differential clutch pack and the ring & pinion. Replacing the rear leaf spring will restore lost ride height and correct the myriad of problems associated with sagging, worn-out springs. This 9-leaf rear spring meets or exceeds factory specifications. It is heat-treated, as was the original, painted with black enamel and has rubber/vinyl liners to assure smooth, quiet operation.

A classic symptom of a bad wheel bearing in your C2 or C3 Corvette is noise. If a wheel is making "funny" noises when driving (squeaks, chirps, squeals, moans, etc.), or you hear a grinding noise when turning, it may indicate a bad wheel bearing. Other symptoms include steering wander or possibly a pull to one side when braking. This premium quality kit includes everything you need to replace your rear wheel bearings. Premium Quality Replacement Wheel Bearing & Seal Kit includes:

- **1 Inner Bearing And Race**
- **1 Inner Seal**
- **1 Outer Bearing And Race**

Due to the construction & design of this part, it must be bolted to a plate to prevent distortion during U-joint installation. The friction fit of the cups requires enough force during installation to warp the flange if it is not bolted to a plate during the pressing operation. These parts are lined bored to assure proper alignment. Any installation of a U-joint without being bolted to a plate will not be accepted as a return.

Items returned after 30 days not in the original packaging will be returned to the customer at the expense of the customer. No returns on electrical products or tools. Returns will not be accepted for any orders older than 90 days. No returns of a partial set, parts will be mailed back to the customer at customer's expense. Exception returns may result in a merchandise credit. There are no returns on seatbelts. There are no returns on special order items. In the event the item is defective it will be replaced. Refunds greater than \$50 will be issued in the form of a company cheque, otherwise they will be refunded by way of their original payment method.

(xix) Cancelled Orders. Please be advised that once an order is submitted to Corvette Depot, there is no guaranteed possibility of cancellation. If you have attempted to cancel your order with us, and your cancellation has been denied, the item or items that you have ordered may not be eligible for cancellation. Painted Products, Floor Mats, Carpet, Interior Softgoods such as Seat Covers / Door Panels), the item is drop shipping from the manufacturer, the item is a gift certificate / digital gift card, or your order is being processed for a return.

If a customer requests cancellation of an order after the order is in processing in our warehouse, or after the goods have actually been dispatched from the warehouse to the shipping department, Corvette Depot reserves the right to charge a restocking fee of up to 30% of the value of the goods, deducted

(xx) Verify Members' Address: Corvette Depot reserves the right to contact a Member via email to verify the accuracy of account information (including the Member's correct name and address) that is needed to provide the Member with the information he or she requested from Corvette Depot. Member emails are automatically subscribed upon checkout to company newsletters with an option to opt out at any time.

(xxi) Pricing Policy: Due to the fluctuation in exchange rate on a daily basis, Corvette Depot cannot provide a refund for any decreases in pricing on our website. Pricing of all parts includes conversion into Canadian dollars based on the daily exchange rate. Corvette Depot reserves the right to cancel any orders due to pricing errors on any products.

(xxii) Electrical Item Warranty: Corvette Depot does not allow any refunds on electrical items, they can only be returned for exchange. All items that fall under this policy will be outlined in a disclaimer below the product name on the shopping cart page along with the product invoice. The reason that there are no returns on electrical items is that too many people try to take advantage of the return system. Instead of using proper diagnostic procedures, some people resort to trial-and-error parts swapping when they don't know how else to fix an electrical problem. When parts they have installed do not fix their problem, they want to return them and try something else. Electrical parts are easily damaged by improper installation or testing. Because electronics are very sensitive to voltage overloads, it does not take much of a voltage spike to ruin a component. Unplugging a wiring connector while the key is still on can create a momentary voltage surge of hundreds of volts. Crossing up the wrong wires or using the wrong test procedures can also damage sensitive electronics. We have no way of knowing whether or not the part has been used or damaged. Because of these risks there are no returns on electrical components. This policy will protect the next customer who might get a bad part that had been returned. Electrical items that are found to be defective within the first 30 days after receipt of product will be covered by our warranty policy. There are no exceptions to this policy.
